Volume 49

January 1989 to June 1989

Taylor & Francis

London • New York • Philadelphia

Subscription Information

The *International Journal of Control* (*ISSN 0020 7179*) is published monthly by Taylor & Francis Ltd, 4 John Street, London WC1N 2ET, UK.

Annual Subscription 1989: £470, US$850.

Second class postage paid at Jamaica, New York 11431. US Postmaster: send address changes to *International Journal of Control*, Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003. Air freight and mailing in the USA by Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003.

Printed in the UK by Taylor & Francis (Printers) Ltd, Rankine Road, Basingstoke, Hampshire RG24 0PR, UK. The paper used in this publication is 'acid free' and conforms to the American National Standards Institute requirements in this respect.

Dollar rates apply to subscribers in all countries except the UK and the Republic of Ireland, where the pound sterling price applies. All subscriptions are payable in advance and all rates include postage. Journals are sent by air to the USA, Canada, Mexico, India, Japan and Australasia. Subscriptions are entered on an annual basis, i.e. January to December. Payment may be made by sterling cheque, dollar cheque, international money order, National Giro, or credit card (Amex, Visa, Mastercard/Access).

Orders originating in the following territories should be sent direct to the local distributor. **Australia:** R. Hill & Son Ltd, 117 Wellington Street, Windsor, Victoria 3181. **New Zealand:** R. Hill & Son Ltd, Private Bag, Newmarket, Auckland 1. **India:** Universal Subscription Agency Pvt. Ltd, 101 102 Community Centre, Malviya Nagar Extn Post Bag No. 8, Saket, New Delhi 110017. **Japan:** Kinokuniya Company Ltd, Journal Department, PO Box 55, Chitose, Tokyo 156. **USA, Canada and Mexico:** Taylor & Francis Inc., 1900 Frost Road, Suite 101, Bristol, Pennsylvania 19007. **UK and all other territories:** Taylor & Francis Ltd, Rankine Road, Basingstoke, Hampshire RG24 0PR.

CONTENTS OF VOLUME 49

NUMBER 1—JANUARY

PAGE

Further observations concerning the strict system equivalence of polynomial system matrices over $\mathbb{R}[s, z]$. M. G. FROST and M. S. BOUDELLIOUA 1

Stability of linear discrete-time systems: geometric considerations. C. B. SOH, C. S. BERGER and K. P. DABKE 15

Deadbeat characteristic of one-step-ahead control. K. ICHIKAWA 25

Stability and stabilizability of chemical reactors modelled with stochastic parameters. T. J. A. WAGENAAR and W. L. DE KONING 33

New design method for discrete-time multi-variable predictive controllers. Y. XI 45

Minimal form of a predictive controller based on the step-response model. Y. XI 57

Decomposition of Roesser model and new conditions for local controllability and local observability. T. KACZOREK 65

Time-optimal output deadbeat regulators with internal stability for invertible systems. M. M. HASSAN and M. H. AMIN 73

Approaches to robust pole assignment. R. BYERS and S. G. NASH 97

Boundary element approach for identification of point forces of distributed parameter systems. K. OHNAKA and K. UOSAKI 119

Parametric eigenstructure assignment for continuous-time descriptor systems. M. M. FAHMY and J. O'REILLY 129

Exact discrete-time modelling of linear analogue systems. S. SHATS and U. SHAKED 145

Set of open-loop block-diagonalizers of transfer matrices. A. BÜLENT ÖZGÜLER and V. ELDEM 161

Model reductions of high-order estimated models: the asymptotic ML approach. B. WAHLBERG 169

Periodic strong solutions of periodically time-varying matrix Riccati equations. T. NISHIMURA and H. KANO 193

Balanced realizations of singularly perturbed systems. S. M. SHAHRUZ and S. BEHTASH 207

On- and off-line identification of linear state-space models. M. MOONEN, B. DE MOOR, L. VANDENBERGHE and J. VANDEWALLE 219

Eigenstructure assignment using dynamical compensator. Z. HAN 233

State-space approach to discrete-time super-optimal H' control problems. I. POSTLETHWAITE, M. C. TSAI and D.-W. GU 247

Conjugation, interpolation and model-matching in H'. H. KIMURA 269

Newton schemes for polynomial spectral factorization: scalar case. M. A. JOHNSON 309

Maximal polytopic stability domains in parameter space for uncertain systems. A. VICINO 351

A matrix inequality. A. HMAMED 363

Simple method for model reference adaptive control. H. SERAJI 367

Optimal multivariable regulation with disturbance measurement feedforward. K. J. HUNT and M. ŠEBEK 373

Correspondence

Comment on 'On sufficient conditions for the stability of interval matrices' S.-J. XU and C.-X. SHAO 379

Corrigenda 383

NUMBER 2—FEBRUARY

PAGE

Backward-pass multiple model adaptive filtering for a fixed-interval smoother. K. WATANABE 385
Variable structure model reference adaptive control using only input and output measurements. Part 1. L. HSU and R. R. COSTA 399
Stability and the matrix Lyapunov equation for delay differential systems. P. AGATHOKLIS and S. FODA 417
Quadratic incentive coordination for non-convex optimal control problems. Part 1: Theory. M. BROMBERG, T.-S. CHANG and P. B. LUH 433
Quadratic incentive coordination for non-convex optimal control problems. Part 2: Parallel algorithms. M. BROMBERG, T.-S. CHANG and P. B. LUH 449
Polynomial matrix linearization and strongly irreducible realization for singular systems. S.-Y. ZHANG 471
Optimal quadratic control of jump linear systems with separately controlled transition probabilities. Y. JI and H. J. CHIZECK 481
Properties of zeros in digital control systems with computational time delay. S. HARA, R. KONDO and H. KATORI 493
Continuous-time model reference adaptive control for an unknown non-linear system. S. SHIN and T. KITAMORI 513
Root sensitivity to parameter uncertainties: a statistical approach. C. PIERRE 521
Adaptive stabilization and tracking under white noise perturbations. A. HALANAY and T. MOROZAN 533
Non-linear adaptive control for robotic manipulators with continuous control inputs. Y. MIYASATO and Y. OSHIMA 545
Estimating robustness on the Riemann sphere. A. K. EL-SAKKARY 561
Recursive prediction error parameter estimator for non-linear models. S. CHEN and S. A. BILLINGS 569
Parameter identification of linear delay systems. F. POURBOGHRAT and D. H. CHYUNG 595
Robust stabilization of non-linear systems. J. HAMMER 629
Computer-aided design procedure for multiobjective LQG control problems. H. T. TOIVONEN and P. M. MÄKILÄ 655
Two-degree-of-freedom dead-beat control system with robustness: multivariable case. Y. ZHAO and H. KIMURA 667
Contractive partial realization. J. MAROULAS 681
New approach to the synthesis of a stabilizing control method for a power system. T. TANIGUCHI and H. KAIZU 691
Implicit self-tuning control for a class of large-scale systems. M. KAMOUN and A. TITLI 713
Control of internally delayed plants by using only input–output signals. K. ICHIKAWA 723

NUMBER 3—MARCH

Compliant motion control for robot manipulators. H. KAZEROONI 745
Observability problem for bearings-only tracking. A. N. PAYNE 761
Existence of optimal control for non-linear multiple-delay systems. K. BALACHANDRAN 769
Robustness properties of tunable digital set-point tracking PID controllers for linear multivariable plants. B. PORTER and A. KHAKI-SEDIGH 777
Optimum feedback patterns in multivariable control systems. K. ÜNYELIOĞLU and M. E. SEZER 791
Generation of trajectory sensitivities: minimal-order realization. W. HAFEZ, K. LOPARO, E. RASMY and M. HASHISH 809
Non-linear control and observation algorithms for a single-link flexible robot arm. S. NICOSIA, P. TOMEI and A. TORNAMBÈ 827
Derivation of the non-linear Schrödinger equation from stochastic optimal control. A. OHSUMI 841
Analysis and design for ill-conditioned plants. Part 1: Lower bounds on the structured singular value. J. S. FREUDENBERG 851

PAGE

Analysis and design for ill-conditioned plants. Part 2: Directionally uniform weightings and an example. J. S. FREUDENBERG ... 873

State feedback and transfer matrix in singular systems. L. DAI ... 905

Lyapunov approach to robust pole-assignment analysis. Y.-T. JUANG, Z.-C. HONG and Y.-T. WANG 921

Order of the compensator and the closed-loop eigenvalues in the fractional approach to design. P. J. ANTSAKLIS ... 929

Necessary and sufficient conditions for robust stabilization of perturbed observer-based compensating systems. B.-S. CHEN and C.-H. LO ... 937

Dynamical feedback compensator for uncertain time-delay systems containing saturating actuator. J.-H. CHOU, I.-R. HORNG and B.-S. CHEN ... 961

One-point feedback approach to distributed linear systems. M. KELEMEN, Y. KANNAI and I. HOROWITZ ... 969

Detection delays, false alarm rates and the reconfiguration of control systems. M. MARITON ... 981

Stability of an entire polytope of polynomials. Y. C. SOH ... 993

Open-loop optimal control of linear time-invariant systems containing the first derivative of the input. E. Y. IBRAHIM, V. LOVASS-NAGY and R. J. SCHILLING ... 1001

Representations of non-linear systems: the NARMAX model. S. CHEN and S. A. BILLINGS ... 1013

Evaluation of quadratic cost functionals for neutral systems: the frequency-domain approach. P. GRABOWSKI ... 1033

Stabilization of non-linear control systems: the role of Newton diagrams. P. E. CROUCH and I. S. IGHNEIWA ... 1055

Tutorial solution to the linear quadratic regulator problem using H_2 optimal control theory. D. A. WILSON ... 1073

Calculation of highly structured stability margins. H. ROTSTEIN, A. DESAGES and J. ROMAGNOLI. 1079
